- Code **G5414** PRESSCARE G300M-2, with 2 boots size “S”
- Code **G5415** PRESSCARE G300M-2, with 2 boots size “M”
- Code **G5416** PRESSCARE G300M-2, with 2 boots size “L”
- Code **G5417** PRESSCARE G300M-3, with 2 boots size “S”, 1 abs/glutes band
- Code **G5418** PRESSCARE G300M-3, with 2 boots size “M”, 1 abs/glutes band
- Code **G5419** PRESSCARE G300M-3, with 2 boots size “L”, 1 abs/glutes band
- Code. **G5420** PRESSCARE G300M-1B, , with 1 sleeve

MODE A: the program sequence inflates and deflates the boot one sector at a time, from the most distal one (foot or hand) to the most proximal one.

MODE B: the program sequence inflates two chambers at a time, simulating the function of the boots with overlapping chambers.

MODE C: the program sequence carries out the pressure starting from the foot and keeping the previous chambers inflated until the entire part (leg, arm or abdomen) is inflated.
